

System 2000
Extension Insert

Order No.: 0333 00

Function

Extension insert for operating dimmers (universal dimmers) or switches from an extension.
The extension insert permits the establishing of installations with the functions of two-way wiring and cross connection with minimum installation expenditure.

The functionality of the extension insert depends upon the main centre used (dimmer, switch) and is described in the Operating Instructions manual of the main centre.

Warning

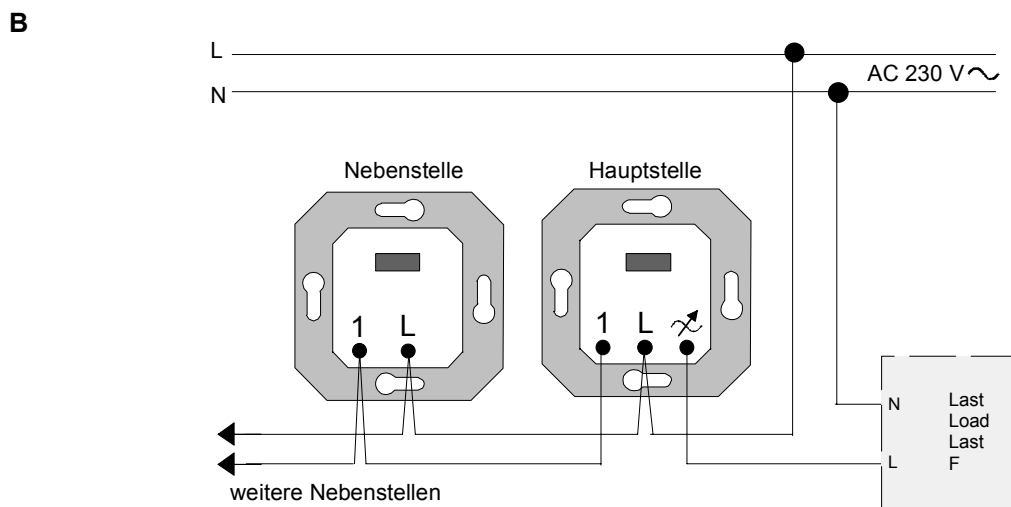

Caution Extensions **Warning** Main centre **Warning** Assembly of electrical equipment may only be performed by a skilled electrician.

Non-observance of the installation instructions may cause fire or other hazards.

Installation Instructions

Install extension insert ① in a connection box according to DIN 49073 (Fig. A).
The connection terminals of the insert must be down.

The extension insert can only be used in combination with the short-stroke pushbutton. Plug short-stroke pushbutton ② onto the insert together with frame ③.
Electrical contacting is established through plug ④.

For the connection, refer to Fig. B.

Specifications

Rated voltage: 230 V AC, 50 / 60 Hz
Connected to: main centre
Number of extensions: unlimited
