

GIRA

Smart Home.  
Smart Building.  
Smart Life.

Smart control  
of lights, blinds  
and heating.

Gira / System 3000

We are Gira.  
We are the ones with the switches.  
But we're so much more.

Future-oriented.  
Certified.  
Responsible.

We're the guardians, innovators,  
Smart Home pioneers, developers,  
system thinkers, KNX partners,  
shapers of the future, patent masters,  
award winners and designers.

But above all, we are the ones  
who listen.  
To you.

Subtle, but smart.  
With distinct focus on quality,  
materials and functions.  
And the driving force of innovation.

In our hearts, we are engineers  
on a mission to inspire.  
With new technologies,  
smart applications and  
impressive attention to detail.

We will always work our hardest  
to find the best solution for you.  
With service, design and performance  
made in Germany.

Because that is what we stand for.  
And have been standing for since 1905.

## Simply start your smart life.

Gira System 3000 offers flexibility and more convenience in your home based on a conventional electrical installation, and allows you to control the lights, blinds and heating.

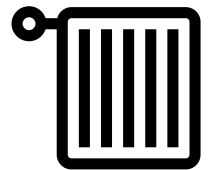

# Room temperature control.

Local operation with programming function

Bluetooth® + App

Highlights, facts and benefits  
Gira System 3000 room temperature control:

Manual room temperature control with a Display device or an app.

Rooms with a pleasant temperature when you are present, energy savings when you are absent.

Three individual time switching ranges can be programmed with the display, and 40 using Bluetooth®.

Automatic heating optimisation:

The target temperature is guaranteed at the set time.

Holiday mode.

Frost protection and valve protection function.

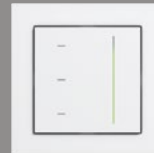

Cooling function with suitable heat pumps.

Can be combined with Gira System 3000 switching inserts.

# Blind controller.

Local operation  
with programming function

Touch top unit

Bluetooth® + app

Standard button

---

 Highlights, facts and benefits  
Gira System 3000 blind control:

---

Raise and lower blinds manually with switches or an app.

Define automatic travel times.

Stabilise the room climate and save energy.

Change and define slat positions.

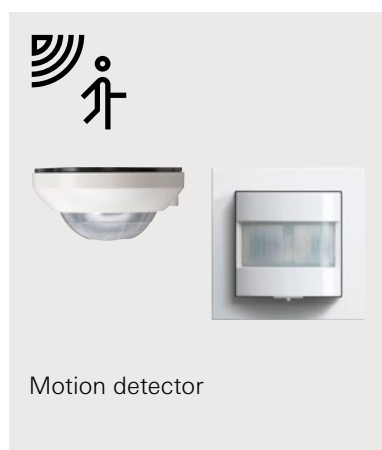

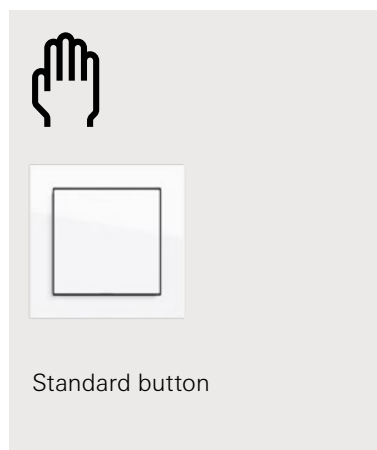

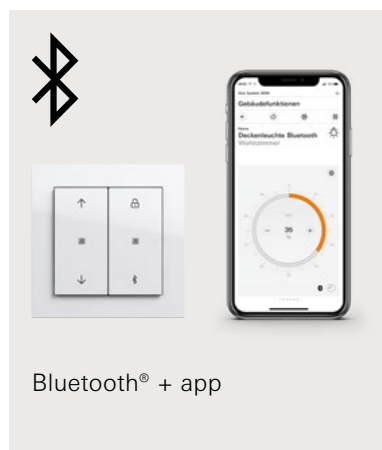

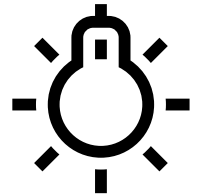

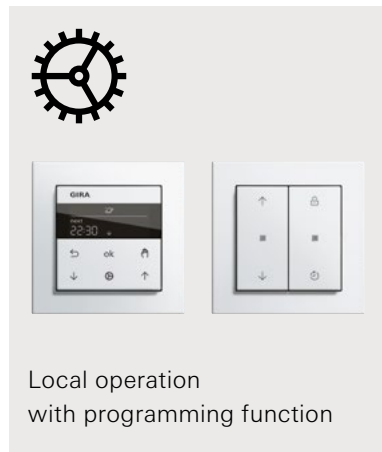

Travel times can be adapted using the integrated astro function for sunrise and sunset.

Presence simulation.

Optional group or central control.

---

# Lighting control.

---

⊕ Highlights, facts and benefits  
Gira System 3000 lighting control:

---

Switching and dimming the lights.

Manual control with switches or an app, or automatically using motion detectors and timers.

Presence simulation.

Individual adjustment of the brightness of the lights.

Night light and hotel function.

Switching times can be adapted to sunrise and sunset using the integrated astro function.

Holiday mode.

---

# The various options for operating Gira System 3000.

## The reliable basic configuration.

Conventional switches for manually operating the lights, blinds and room temperature with basic convenience functions such as shading positions that can be saved.

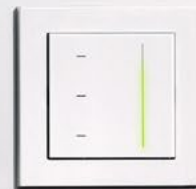

---

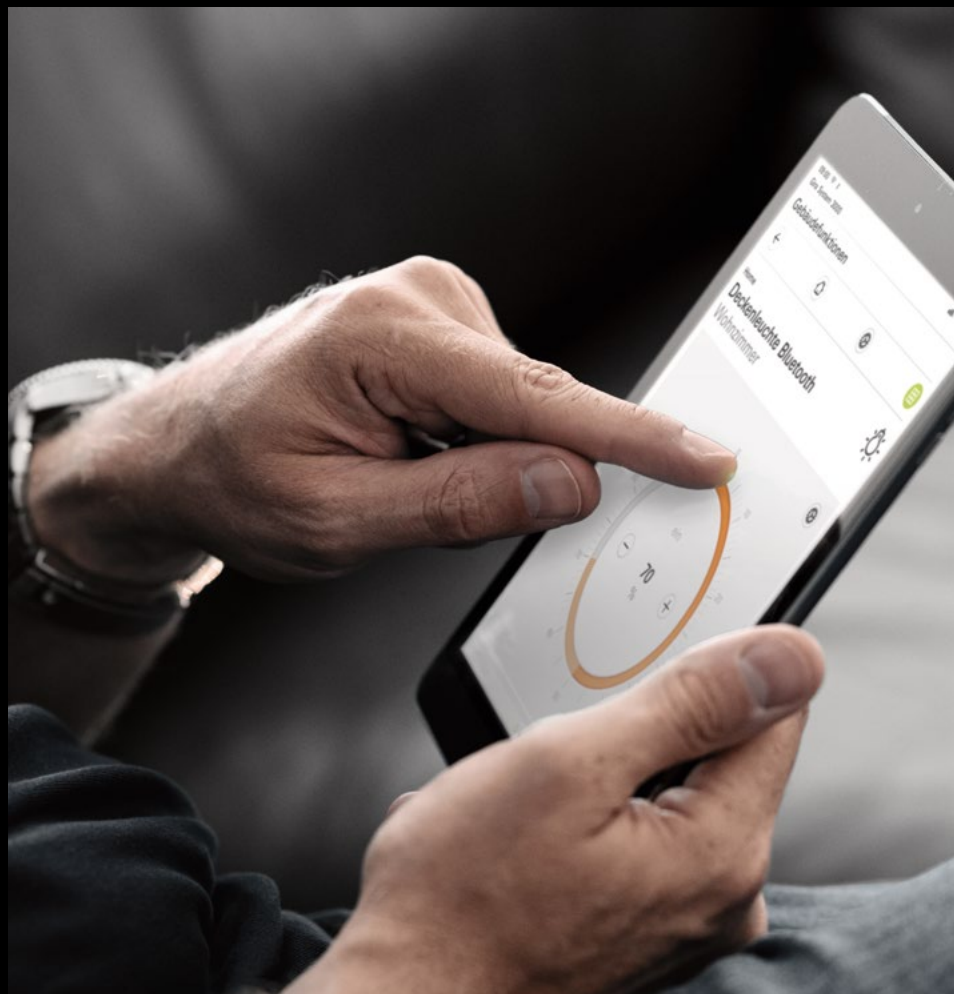

## Control lights and blinds intuitively.

Switch without switches by using an intuitive interface instead: the Gira System 3000 touch top unit combines the classic on and off function with a practical dimming function. So as well as activating or deactivating lights and blinds with a brief tap, you can also adjust the brightness with the swipe of a finger.

## Bluetooth® for more convenience.

Adjust and control blinds, lights and the heating conveniently and to suit requirements using the Gira System 3000 Bluetooth® operating top unit and app.

## Gira IP flush-mounted radio.

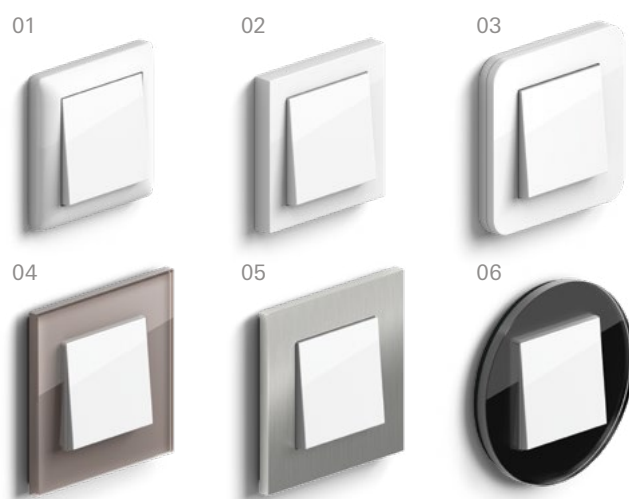

Radio, music player and alarm in one:

The new Gira IP flush-mounted radio (also known as WLAN radio) can be installed in any room without any major effort. The device is integrated directly into the wall, just like light switches and socket outlets. It can be controlled directly on the radio or conveniently from your sofa using the Gira System 3000 App.

# Many functions, countless designs, one system.

Nothing stays the same. Even buildings change. That's why flexibility is a top priority at Gira.

Selection of  
design lines.

- |  |                                   |

New options are created through smart technology for rooms, technical advancements arrive in our homes, designs follow trends. The modular principle applies to function and design. Just about every system component can be combined and replaced in a sustainable manner.

Today and in the future. Gira System 55, for example, offers more than 300 functional inserts, from the socket outlet and switch to the Gira radio. Thanks to the standard format, the cover frames can be easily exchanged. Pick your favourites from eleven design lines with over 90 frame variants.

Gira System 3000 / System 3000 with KNX RF

# Using wireless technology for a Smart Home.

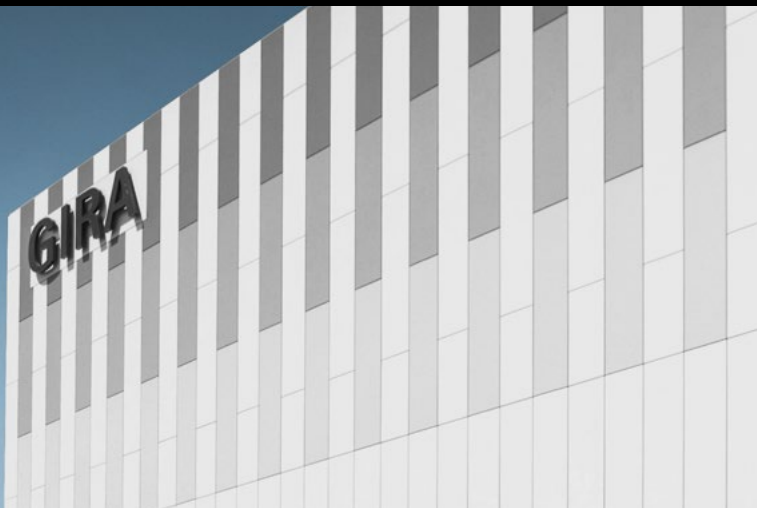

Gira KNX systems can now be installed as wireless systems on the basis of the latest RF technology and the Gira System 3000 inserts. This gives you even more freedom when retrofitting and renovating – for a Smart Home that is fit for the future.

# Being innovative means thinking beyond your own four walls.

Since 1905, we've been the ones with the switches, but we're so much more ... Because innovation is our great passion. Our pioneering spirit drives us to constantly improve and enhance the comfort of people's homes with innovative solutions.

"Made by Diversity".

Gira has been manufacturing products at its location in Radevormwald for more than 100 years. The company is fully committed to the "Made in Germany" quality standard. This is what 1,250 employees from 27 nations work for – each and every one of them with different talents, individual expertise, wide-ranging experiences and different life stories. This diversity – supported by shared values – provides the basis for our creativity, innovative strength and future viability.

Innovative technology,  
award-winning design.

We have always aspired to combine maximum functionality and reliability with a unique design to create special user experiences. The extraordinary design quality and functionality of our products have been recognised by many internationally acclaimed awards.
